

## RESPONSIBLE SOURCING POLICY

Husky Plywood Ste-Thérèse is a decorative hardwood plywood manufacturer, which buys components (multiple species of veneer, cores of PC, MDF, VC and MVCM) to laminate veneers on a core following specific request from customers.

*We believe in responsible yield forestry management, to maintain the sustainability of our resources and perpetuate our art!*

We make the commitment to evaluate our suppliers, in order to reduce significantly the risk that they would supply us wood from unacceptable sources, that doesn't meet the requirements of FSC Controlled Wood ([SGSNA-CW-004564](#)).

Our suppliers must confirm to us, that they implement best efforts to avoid purchasing wood from the following categories:

- Illegally harvest wood
- Wood harvested in violation of traditional or civil rights
- Wood harvested from protected forests or which has high conservation values threatened by management activities
- Wood harvested from areas being converted from forests and other wooded ecosystems to plantations or non-forest uses.
- Wood from forests in which genetically modified (GM) trees are planted.

We use a stringent method to analyze that risk, in order to assure our customers that the panels we supply them, are in compliance with a responsible forest management, environmentally, socially and economically.
